VOLUME 42, 1975

CAMBRIDGE UNIVERSITY PRESS

PUBLISHED BY
THE SYNDICS OF THE CAMBRIDGE UNIVERSITY PRESS
Bentley House, 200 Euston Road, London, NW1 2DB
32 East 57th Street, New York, N.Y. 10022

Printed in Great Britain at the University Printing House, Cambridge

Contents

No. 1 (February 1975)

PAGE

Interspecies study on the effect of perphenazine on milk yield and composition. J. Shani (Mishkinsky), A. T. Cowie and W. H. Broster . . 1

Influence of sympathomimetic drugs on the motility of bovine teat muscles. G. Peeters and R. de Bruycker 11

Organochlorine content of milks, dairy products and animal feed ingredients: Ireland 1971–1972. W. K. Downey, M. P. Flynn and S. A. Aherne . 21

Proteolysis detection in milk. III. Relationships between bacterial populations, tyrosine value and organoleptic quality during extended cold storage of milk and cream. H. S. Juffs 31

Some physico-chemical properties of porcine milk. M. C. T. Hoynes and P. F. Fox 43

Studies on the heat stability of milk protein. II. Effect of exposing milk to light. A. W. M. Sweetsur and J. C. D. White 57

Studies on the heat stability of milk protein. III. Effect of heat-induced acidity in milk. A. W. M. Sweetsur and J. C. D. White 73

Properties of aseptically packed ultra-high-temperature milk. III. Formation of polymerized protein during storage at various temperatures. A. T. Andrews 89

Separation of the glycopeptides released by the action of rennin on whole milk. G. Simpson, G. Sinkinson and J. V. Wheelock 101

Proteolysis in Cheddar cheese: influence of the rate of acid production during manufacture. R. B. O'Keeffe, P. F. Fox and C. Daly . . . 111

The nature of the stimulation of the growth of *Streptococcus lactis* by yeast extract. J. Selby Smith, A. J. Hillier, G. J. Lees and G. R. Jago . 123

Citrate utilization in milk by *Leuconostoc cremoris* and *Streptococcus diacetilactis*. T. M. Cogan 139

Peptidase activities in Group N streptococci. L. Mou, J. J. Sullivan and G. R. Jago 147

Preparation and properties of α_s-casein from buffalo's milk. M. H. Abd el-Salam 157

Preparation and properties of β-casein from buffalo's milk. M. H. Abd el-Salam and S. el-Shibiny 163

A study of the properties of dissociated bovine case in micelles. L. K. Creamer and G. P. Berry 169

PAGE

Autoxidation in milk rich in linoleic acid. I. An objective method for measuring autoxidation and evaluating antioxidants. G. S. SIDHU, M. A. BROWN and A. R. JOHNSON. 185

Reviews of the progress of Dairy Science. Water-soluble vitamins in milk and milk products. M. E. GREGORY 197

No. 2 (June 1975)

Studies on the milk composition of West African dwarf, Red Sokoto and Saanen goats at different stages of lactation. I. Total solids, butterfat, solids-not-fat, protein, lactose and energy contents of milk. A. U. MBA, B. S. BOYO and V. A. OYENUGA 217

Fluoro-opto-electronic cell-counting on milk. P. SCHMIDT MADSEN. . . 227

The use of marker enzymes to assay the churning of milk. D. J. STANNARD . 241

Tributyrate as a substrate for the determination of lipase activity in milk. H. B. CASTBERG, P. SOLBERG and T. EGELRUD 247

Lipases in bovine milk and the relationship between the lipo-protein lipase and tributyrate hydrolysing activities in cream and skim-milk. H. B. CASTBERG, T. EGELRUD, P. SOLBERG and T. OLIVECRONA 255

The precipitation of proteins by carboxymethyl cellulose. J. G. ZADOW and R. D. HILL 267

Proteolysis detection in milk. IV. Starch-gel electrophoresis and formol titration. H. S. JUFFS 277

The effect of oxygen content on flavour and chemical changes during aseptic storage of whole milk after ultra-high-temperature processing. E. L. THOMAS, H. BURTON, J. E. FORD and A. G. PERKIN 285

The preparation and assessment of a suitable *Mucor pusillus* Lindt proteinase–swine pepsin mixture for Cheddar cheese-making. M. L. GREEN and A. STACKPOOLE 297

Accelerated cheese ripening: a method for increasing the number of lactic starter bacteria in cheese without detrimental effect to the cheese-making process, and its effect on the cheese ripening. H.-E. PETTERSSON and G. SJÖSTROM 313

Acid phosphatase activity in cheese and starters. A. T. ANDREWS and E. ALICHANIDIS 327

Observations on the microscopic crystalline inclusions in Cheddar cheese. B. E. BROOKER, D. G. HOBBS and A. TURVEY 341

No. 3 (October 1975)

PAGE

Relationships between stage of lactation and pregnancy and blood composition in a herd of dairy cows and the influences of seasonal changes in management on these relationships. G. J. Rowlands, R. Manston, R. M. Pocock and S. M. Dew 349

Urea and phosphate supplemented molassed sugar-beet pulp nuts used as a major component of milk production concentrates for dairy cows. J. J. Parkins, G. Fishwick, N. S. Ritchie, R. G. Hemingway and R. Henderson 363

Carnitine secretion into milk of ruminants. A. M. Snoswell and J. L. Linzell 371

Association of bovine α_{s1}- and β-casein using the fluorescent properties of 1,8-anilinonaphthalene sulphonate. L. K. Creamer and J. V. Wheelock 381

The acid phosphates of bovine leucocytes, plasma and the milk of healthy and mastitic cows. A. T. Andrews and E. Alichanidis . . . 391

Membrane material in bovine skim-milk from udder quarters infused with endotoxin and pathogenic organisms. M. Anderson, B. E. Brooker, A. T. Andrews and E. Alichanidis 401

High-melting-point triglycerides and the milk-fat globule membrane. F. B. P. Wooding and P. Kemp 419

Heat stability of milk: Influence of colloidal calcium phosphate and β-lactoglobulin. P. F. Fox and M. C. T. Hoynes 427

Relationship between temperature and sterilizing efficiency of heat treatments of equal duration. Experimental testing with suspensions of spores in milk heated in an ultra-high-temperature sterilizer. J. Hermier, P. Begue and O. Cerf 437

A procedure for the isolation of gastric enzymes. P. A. O'Leary and P. F. Fox 445

Milk gel structure. IV. Microstructure of yoghurts in relation to the presence of thickening agents. M. Kalab, D. B. Emmons and A. G. Sargant . 453

Reviews of the progress of dairy science. The milk-fat globule membrane. M. Anderson and T. E. Cawston 459

Index of Subjects

Antioxidants, evaluation, milk rich in linoleic acid, 185
Autoxidation, *see* **Oxidation**

Blood, composition, lactation and/or pregnancy stage, relationship, 349
leucocytes, plasma, acid phosphatases, 391
Buffalo(es), milk, α_s-casein, 157
β-casein, 163
Butterfat, *see* Milk fat

Calcium phosphate, colloidal, heat stability, milk, 427
Carboxymethyl cellulose, precipitation of proteins, 267
Carnitine, concentration, milk, 371
Casein, micelles, dissociated, properties, 169
yoghurt, 453
α_s-Casein, preparation, properties, buffalo's milk, 157
α_{s1}-Casein, β-casein, association, 381
β-Casein, preparation, properties, buffalo's milk, 163
Cheddar cheese, crystalline inclusions, 347
production, mixture, 2 rennet substitutes, 297
proteolysis, effect of rate of acid production, 111
Cheese, and starters, acid phosphatase activity, 327
Cheesemaking, *see* **Cheddar cheese, Cheese ripening**
Cheese ripening, acceleration, lactic starter bacteria, number, increase, 313
Chymosins, *see* **Rennins**
Citrate, utilization, starters, milk, 139
Coagulation, milk protein, heated, colloidal calcium phosphate, β-lactoglobulin, influence, 427
factors, 57, 73
Concentrates, *see* **Diet**
Cream, lipoprotein lipase, tributyrate hydrolysing activities, relationship, 255

Dairy products, *see also individual products*
insecticidal contamination, Ireland, 1971–2, 21
water-soluble vitamins, content (review), 197
Diet, molassed sugar-beet pulp, urea, phosphate added, milk yield, 363
Disease, *see* **Mastitis**

Enzymes, *see also* **Lipase(s), Pepsin, Peptidase, Phosphatase(s), Rennet, Rennin(s)**
release, milk fat globule membrane, index of milk churning, 241

Feeding-stuffs, insecticidal contamination, Ireland, 1971–2, 21

Flavour, milk, UHT treatment, varying O_2 content, storage, 285

Glycopeptides, released, milk, action, rennin, separation, 101
Goats, milk, composition, 217

Heat stability, *see* **Coagulation**, milk protein, heated
Heat treatment, *see* **Sterilization**

Insecticides, contamination, milks, dairy products, animal feed ingredients, Ireland, 1971–2, 21
Ireland, insecticidal contamination, milks, dairy products, animal feed ingredients, 1971–2, 21

Lactation, stage, composition, blood, 349
Lactic acid bacteria, treated, added, cheesemaking, ripening, accelerated, 313
β-Lactoglobulin, heat stability, milk, 427
Leuconostoc cremoris, citrate utilization, milk, 139
Light, effect on heat stability, milk protein, 57
Linoleic acid high levels, milk fat, oxidation, 185
Lipase(s), milk, activity, tributyrate as substrate, 247
identification, 255

Mastitis, acid phosphatases, milk, 391
milk membrane material, skim-milk, 401
Membrane material, skim-milk, from infected quarters, 401
Milk, acid phosphatases, 391
action of rennin, glycopeptides, separation, 101
carnitine, concentration, 371
cell counts, fluoro-opto-electronic instrument, 227
coagulation, *see* **Coagulation**
insecticidal contamination, Ireland, 1971–2, 21
lipase(s), activity, tributyrate as substrate, 247
identification, 255
pigs, physico-chemical properties, 43
proteolysis, detection, 31, 277
UHT sterilization, changes, storage, 89
flavour, chemical changes, varying O_2 content, 285

Milk composition, goats, 217
perphenazine, effect of, 1
UHT sterilized, stored, 89
water-soluble vitamins, content (review), 197
Milk fat, globule, damage, detection, 241
membrane (review), 459
triglycerides, 419
linoleic-acid rich, oxidation, 185

Milk protein(s), *see also* **Proteins**
breakdown, *see* **Proteolysis**
heat stability, colloidal calcium phosphate, β-lactoglobulin, influence, 427
factors, 57, 73
polymerization, UHT sterilized milk, stored, 89
Milk yield, feeding, molassed sugar-beet pulp, urea, phosphate added, 363
perphenazine, effect of, 1
Mucor pusillus Lindt proteinase (Noury rennet), swine pepsin, mixture, cheesemaking, 297

Oxidation, milk fat, linoleic-acid rich, 185
Oxygen, dissolved in UHT milk, flavour, chemical changes, during storage, 285

Pepsin, bovine, ovine, caprine, isolation, 445
swine, *Mucor pusillus* Lindt proteinase, mixture, cheesemaking, 297
Peptidase, activities, Group N streptococci, 147
Perphenazine, action, milk-yield, -composition, 1
pH, Cheddar cheese, proteolysis, 111
milk protein, heat stability, 57, 73, 427
Phosphatase(s), acid, activity, cheese, and starters, 327
leucocytes, plasma, normal-, mastitic-milk, 391
Phosphate, urea, supplement, molassed sugar-beet pulp, milk yield, 363
Pigs, milk, physico-chemical properties, 43
Pregnancy, stage, composition, blood, 349
Proteins, *see also* **Milk protein(s)**
precipitation by carboxymethyl cellulose, 267
Proteolysis, Cheddar cheese, effect of rate of acid production, 111
milk detection, 31, 277

Rennet, substitutes, mixture, cheesemaking, 297
Rennin(s), action, milk, glycopeptides, separation, 101
lamb, piglet, kid, isolation, 445

Separated milk, *see* **Skim-milk**
Skim-milk, from infected quarters, membrane material, 401
lipoprotein lipase, tributyrate hydrolysing activities, relationship, 255
Starters, and cheese, acid phosphatase activity, 327
citrate utilization, milk, 139
Sterilization, UHT, milk, changes after storage, 89
temperature, sterilizing efficiency, relationship, 437
varying O_2 content, flavour, chemical changes, during storage, 285
Storage, milk, UHT sterilized, changes, 89
varying O_2 content, flavour, chemical changes, 285
Streptococci, Group N, peptidase activities, 147
Streptococcus diacetilactis, citrate utilization, milk, 139
S. lactis, growth, stimulation, yeast extract, 123
Sugar-beet, pulp, molassed, urea, phosphate added, milk yield, 363
Sympathomimetic drugs, teat muscles, motility, 11

Teat, muscles, motility, effect of sympathomimetic drugs, 11
Temperature, protein polymer formation, UHT sterilized milk, stored, 89
Triglycerides, milk-fat globule membrane, 419

Urea, phosphate, supplement, molassed sugar-beet pulp, milk yield, 363

Vitamins, water-soluble, content, milk, milk products (review), 197

Yeast extract, stimulation, growth, *Streptococcus lactis*, 123
Yoghurts, microstructure, thickening agents added, 453
